

WHAT'S PANGMAN

When alien spheres from outer space invade our beloved planet, only the Buster siblings stand fast... Pangman takes you inside a VR classic arcade game experience, where your goal is to burst as many spheres as possible by using a pair of guns that transform into hooks when you throw them. Complete 140 story mode levels in individual or cooperative campaign, and enjoy frantic multiplayer games with up to 8 players.

LENGTH AND PRICE

Story mode includes 140 levels that offer at least 5 hours of gameplay, which can be played with a friend in a cooperative campaign. There's also an online multiplayer mode for up to 8 players, adding to replayability.

We plan to charge \$11,99 for Pangman when it ships.
